

# Understanding Germs Activity

# Materials

Glitter or  
Glow Powder Kit,  
and  
UV Flashlight

# Instructions

First, read the book "Do Not Lick this Book" and take the time to help your child understand what germs are and how they spread.

Next, put the powder or lotion on your hands.

Then, have your children walk around the room touching surfaces. Touch door knobs, walls, and all the places you would normally touch.

Last, get out the UV Flashlight and shine it on the surfaces you have touched.

This simulates the unseen germs and allows children to understand the importance of washing their hands. You can also put the powder or lotion on their hands. Look at their hands with the UV light then ask them to wash their hands. Shine the UV light again to see how many "germs" are left on their hands.

This is great for teaching good handwashing skills.
